Penile Peyronie's Disease pathway (adults)

This pathway has been developed from published guidance, in collaboration with local urologists.

This guidance is to assist GPs in decision making and is not intended to replace clinical judgment.

Patient presents with mild Peyronie's disease/deformity:
Without pain
Not sexually active or few or not difficulties with sexual intercourse

Patient presents with moderate-severe Peyronie's disease/deformity:
Sexual intercourse painful, difficult or not possible

Reassure and advise

Urology referral
(Patient should bring two photographs of erect penis each from two different angles to consultation)

Link to patient information leaflet
